CCP Environmental Policy

Cornish Concrete Products Ltd (CCP) believes that we should achieve the highest standards of environmental performance and continually aim to minimise the environmental impact of our operations and our products.

We regard compliance with relevant environmental laws and the adoption of responsible standards where no legislation exists as minimum standards but aim for a higher level of performance than the base level of statutory responsibility.

Accordingly, CCP is committed to:

- Complying with all applicable environmental legislation, regulations and standards
- Maintaining an independently certified BS EN ISO 14001 compliant Environmental Management System (EMS) for the implementation of its environmental policy objectives.
- Continually developing and improving our operations and methods of work in order to:
 - Reduce waste generation and recycle waste back into the production process
 - Reduce energy and water consumption and carbon emissions per tonne of production
 - Ensure effective use of natural resources
 - Preferentially using raw materials from suppliers that can demonstrate active environmental stewardship and efficient use of resources.

These aspects will be monitored, assessed and controlled within the EMS against established improvement targets and objectives. Performance will be reported to stakeholders.

- Including assessment of environmental impacts in the business decision making at all levels.
- Understanding and reducing the environmental impact of the delivery of our products to customers.
- Raising environmental awareness through the development and training of our employees and open communication and consultation with our customers, suppliers and others on relevant environmental matters.

Signed:

Richard Tatlow – Production Director
